The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/540,999	Applicant(s) MORSI, HESHAM	
	Examiner SUBA GANESAN	Art Unit 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/29/2008 has been entered.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The fused junctures are not described in the specification as "non-inflatable". It is suggested that applicant amend claim 1 to recite that the fused junctures are "non-expandable" or "non-expansive" to assure antecedent basis from the specification.

3. The specification does not provide proper antecedent basis for the claimed term "web reinforcement".

4. The specification does not provide proper antecedent basis for the claimed feature "fluid impermeable" seal of the first outer wall and the second inner wall.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 3774

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1, 4-5, 8-9, 15-16, 19-21, 33, 37-39, 42, and 46-47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

7. Claims 1, 33, 38, and 42: The specification does not describe or support the limitation that the web reinforcements are "non-elastic" or "inelastic".

8. Claim 1: The specification does not describe the fluid chambers as "non-elastically extensible."

9. Claim 1: the "acute angle" of the tapered fused juncture is not described.

10. Claim 4: There is no support for a "variably sized" width of a fused juncture.

11. Claims 33: The specification does not describe "a graft having an inflated diameter compatible with an un-diseased body lumen and a length greater than the diseased portion of said cerebral vessel lumen" or that "the graft contacts an undiseased portion of the cerebral vessel lumen"

12. Claims 38 and 39: "side fenestrations" are not described in the written description or the drawings, other than a nominal recitation of the terms "side fenestrations".

13. Claim 47: The specification does not support the limitation "dimpled" outer wall surface.

Art Unit: 3774

14. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

15. Claim 33 recites the limitation "said cerebral vessel lumen" in line 4-5. There is insufficient antecedent basis for this limitation in the claim.

16. Claim 1 recites the limitation "non-elastically extensible fluid chambers" in section f line 2-3. It is unclear whether these fluid chambers are the same fluid chambers recited in section d line 6 or whether they are different/additional fluid chambers.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SUBA GANESAN whose telephone number is (571)272-3243. The examiner can normally be reached on M-F 7-4.
